

WHY MYSPACE?

What is MySpace?

MySpace is the premier lifestyle portal for connecting with friends, discovering popular culture, and making a positive impact on the world. MySpace users find old friends and family members, plan their social lives, discover new music, promote charities and civic causes, and express themselves creatively on their MySpace pages. MySpace is a new mechanism of communication and self expression for the Internet generation.

MySpace is a social networking website with an interactive, user-submitted network of friends, personal profiles, blogs, groups, photos, music, and videos for teenagers and adults internationally.

Why Teens Are On MySpace

Millions of people have created personal profiles on MySpace, but it is an activity that has resonated especially with adolescents. In fact, 61% of teenagers have a personal profile on a social networking site. Teens 13 and older use MySpace to connect with friends and find others that share similar interests. MySpace plays an important communication and social support role in teens' daily lives. They are using MySpace to express themselves, their thoughts, ideas, creativity, and opinions on politics, art, music and life. The site also provides a place for teens to discover and showcase their various talents, such as filmmaking, comedy and music.
